

A new alternative for housing in the Pilbara

If you're looking around for just the right house for your block - Alternative Living Transportable Modular Solutions could be the answer.

But these aren't your average transportable homes.

Along with new generation styling and construction, they come with a minimum five star energy rating, which means they not only look great, they are more environmentally friendly, water wise, energy efficient and cost effective.

What's more, the homes are manufactured in WA by a WA-owned company in just 16 weeks, then delivered to site and put together in one day.

If you'd like to know more, Alternative Living is conducting a series of Information Evenings this month.

This will be a great opportunity to discover the benefits and advantages of this amazing modular housing firsthand.

Alan and Andrew will be at the Karratha International Hotel on February 23, the All Seasons in Port Hedland on February 24, and in Newman at the Seasons Hotel on the 25th.

The guys will be there between 6pm and 9pm, so bring your block plans and your house designs, and they'll be happy to answer all your questions and discuss your personal housing requirements.

You can register beforehand with Andrew on 0430 391 324, or just turn up on the night.
